

Oleksii Zakira

Full-stack developer
& UX/UI Designer

About me

Hello, my name is Oleksii Zakira. I was born on May 6, 1993 in Cherkasy (Ukraine). Married, no children. Now I live in Kiev (Ukraine). I have pretty big experience in front-end, back-end and mobile development since 2009. I'm geek, a bit rolled up on electronics and computers. I'm constantly learning something new, trying new technologies. Open to any interesting offers. Now the main hobby is sports and hardware engineering.

My skills

Front-end development:

Javascript (ES5/ES6), AJAX, React.js, Vue.js, HTML5, SASS, LESS, CSS3, Gulp, Webpack, Canvas, Three.js, WebSockets, PWA, WebGL

Back-end development:

Node.js, Meteor, Express.js, MongoDB, MySQL, PostgreSQL, PHP (Slim & Laravel Framework), Lua, Python, AWS, Azure, Google Cloud. Ubuntu Server, Windows Server

Mobile development:

Swift, ReactNative, NativeScript, Corona SDK, Unity 3D, PhoneGap, Apache Cordova

Work experience

Lead Software Engineer

INNOVECS LLC 15 Aug 2019 - 1 Oct 2019

We worked on a fintech service (web and mobile application) with a small development team. The project was closed.

Team Lead React Native developer

smartwork solutions GmbH 1 Sep 2018 - 15 Aug 2019

We are developing a word processing mobile application using cross-platform solution – React Native.

Full-stack developer

The Moon Agency 15 Feb 2017 - 31 Aug 2018

I modestly call my position in this company a full-stack developer, but in fact I'm responsible for the entire development department. The company is small, but we make great products - mobile applications, web services, websites, interactive panels for shopping centers, AR, VR, mobile games.

Founder & Full-stack developer

SHEZAK LAB 4 May 2014 - 15 Feb 2017

I took on too much. I ran a small team of developers, I searched for projects, sold services to clients, talked to clients, developed most of the projects. I stopped because of fatigue, but it was an excellent experience.

Front-end developer

uCoz Web Services 15 May 2012 - 4 May 2014

My duties included: creating site templates for uCoz system, developing interfaces for the service control panel, creating promo-landings for the company.

Web developer & UX/UI Designer

Freelance 24 Jun 2009 - 15 May 2012

First work experience. I started as a designer, did the design of banners for sites. Later I started to create a website design. After a while my interest manifested itself to the creation of sites. These were sites on the Wordpress and Joomla.

Education

Maintenance and repair of motor vehicles

Cherkasky Polytechnical Technical School 1 Sep 2008 - 4 May 2012

Technical education related to the automotive business. It is interesting, but heart and soul already in those years lay to computer sciences. During my studies, I studied self-education in computer science and web design.

Languages

English (Intermediate)

Ukrainian (Native)

Russian (Native)

Last works

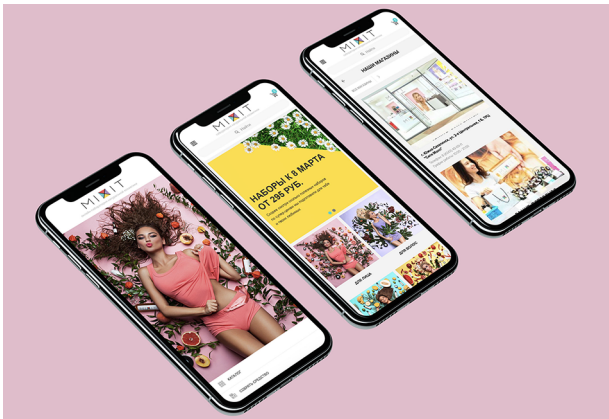

The navigation panel for the DreamTown shopping center (Kiev, Ukraine)

About:

Develop an interactive navigation panel for the shopping center. The difficulty was that the building has 3 floors and the shape of the building is very long. The main requirement of the client was to make the building in 3d format. Since the building is very long, the standard approach could not be used, therefore an isometric rendering camera.

Stack:

Node.js, Blender, Three.js, React.js, Electron

Mobile application for MIXIT online store

About:

MIXIT - online store of natural cosmetics from Russia. This is a cross-platform mobile application. It is available in Google Play and App Store (name: MIXIT).

Platforms:

Android, iOS

Stack:

React Native

Mobile application Audi Sport RS Tracker

About:

Audi Ukraine - the official dealer of Audi in Ukraine. The application is developed for test drives of new models Audi RS. Capabilities: definition of speed, definition of arrival distance, generation of arrival card, the opportunity to share in your social networks with your result.

Platforms:

Android, iOS

Stack:

Apache Cordova

Web-service Du Jour

About:

Development of a service for the creation of an online menu of restaurants and hotels. Functionality includes: creating a new client's cabinet, filling the content with the client, accepting orders, and statistics. The customer has not yet launched the project.

Stack:

React.js, Node.js, Express.js, MongoDB, CSS3, HTML5, ES6
